

SpeedStrap™ Magnetic Printing Pull Band

The Dicar SpeedStrap for printing is a reusable, quick and cost effective way to maximize sheet control through non-printing downs or print stations. The SpeedStrap's magnetic backing allows the strap to be quickly placed and positioned to enhance registration and provide maximum sheet control resulting in fewer jams and higher quality.

FEATURES:

- Position the SpeedStrap on the print cylinder to provide sheet support and control through non-printing print stations
- Can be used in combination with narrow print plate to support wide sheets
- Wide magnetic strip delivers strong, positive grip, no bolts required
- Quick/easy on and off, simply lay it in place and peel it off
- Reduces waste and chance of jams for enhanced efficiency
- Safe, effective and easy to use
- Fits full range of machine sizes
